DETAILED ACTION

Applicants' response filed on 2/2/2009 is made of record. Claims 16-24 are pending. In view of applicants' response, the prior art 102 (b) rejection made in the previous office action has been obviated.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 16-18 and 20-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

1. Recitation of "said ... aryl or heteroaryl..." in the definition of R' in claim 16 renders claim 16 and its dependent claims indefinite as it is not clear what is intended. Note R' has not aryl or heteroaryl as variable choices.
2. Recitation of Q represents CRy in claim 16 renders claim 16 and its dependent claims indefinite as it is not clear what is intended. Note the valence requirement of carbon in CRy has not been met with. Hence, the scope of Q remains unknown.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 19 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one

Art Unit: 1624

skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 19 includes species which are not in the examples recited in the species. For example, claim 19 recites species having an adamantyl group at 1-position of benzimidazole which are not taught in the specification. See last but 4 and 5 species. Also there are no species bearing 1-dimethoxymethyl and 1-diethoxymethyl bearing species. All species claimed should be in the examples. A careful analysis of species claimed and made is required.

Allowable Subject Matter

Claims 16-18 and 20-24 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
